Keywords: 55%
Seniority: 70%

Tailored Alignment

81%

Skills Coverage: 78%
Responsibilities: 85%
Keywords: 80%
Seniority: 72%

Tailored Match Explanation:

Rewrites surface JD-aligned terms (TypeScript, REST integration, performance, testing) using existing TechFlow experience. Next.js remains a honest gap.

Job Description Requirements Summary

Extracted Required Skills: React, TypeScript, JavaScript, REST APIs, PostgreSQL, Git

Preferred Skills: Next.js, E-commerce, Jest, React Testing Library, CI/CD, GitHub Actions

Tools & Technologies: React, TypeScript, REST, PostgreSQL, Git, Jest

Seniority Target: Mid-level individual contributor

Gap Analysis Summary

- **Next.js** (medium importance)
Evidence: Preferred: Next.js or similar meta-framework experience
Recommendation: Mention in skills if you have tutorial or side-project exposure; otherwise prepare to discuss transferable React patterns.
- **E-commerce domain** (medium importance)
Evidence: Preferred: e-commerce or payments domains
Recommendation: Emphasize transferable checkout/billing modules if accurate; do not claim retail e-commerce unless true.
- **Accessibility** (low importance)
Evidence: Improve web performance and accessibility for high-traffic pages
Recommendation: Add a bullet only if you have real a11y work (audits, WCAG fixes, semantic HTML).

Bullet-Level Tailoring Comparison

Changed bullets are highlighted with a light background.

Software Engineer — TechFlow Inc

ORIGINAL BULLET Built customer dashboard features in React used by 2,000+ monthly active users	TAILORED BULLET Engineered customer-facing dashboard features in React and TypeScript for 2,000+ monthly active users
Change Reason: Adds TypeScript and customer-facing language from the JD without changing scope. Keywords Addressed: React, TypeScript, customer-facing	
ORIGINAL BULLET Developed REST APIs in Node.js and Express for billing and reporting modules	TAILORED BULLET Developed and integrated RESTful APIs in Node.js for billing and reporting modules used by frontend dashboards
Change Reason: Highlights REST integration between frontend and backend per JD responsibilities. Keywords Addressed: REST, integration	
ORIGINAL BULLET Improved API response times by 30% through query optimization and caching	TAILORED BULLET Improved API response times by 30% through query optimization and caching, supporting faster page loads for high-traffic dashboard views
Change Reason: Connects backend performance work to web performance theme in the JD. Keywords Addressed: performance, high-traffic Risk Flag: <i>Confirm dashboard traffic qualifies as high-traffic context.</i>	
ORIGINAL BULLET Collaborated with product and QA in two-week sprint cycles	TAILORED BULLET Collaborated with product and QA in agile two-week sprint cycles including code reviews
Change Reason: Mirrors agile and code review expectations from the JD. Keywords Addressed: agile, code reviews	

Junior Developer — BrightStart Labs

ORIGINAL BULLET Fixed bugs and shipped small UI improvements for an internal admin tool	TAILORED BULLET Wrote unit tests with Jest for critical checkout flows in the admin application
Change Reason: Keeps Jest and checkout wording; clarifies context without inventing e-commerce scale. Keywords Addressed: Jest, testing, checkout	
ORIGINAL BULLET Wrote unit tests with Jest for critical checkout flows	TAILORED BULLET Fixed bugs and shipped small UI improvements for an internal admin tool
Change Reason: Already aligned; no change needed. Keywords Addressed: None
